

HOW TO DETERMINE YOUR HEIGHT

If your mom is 5'2" and your dad is 6'2", your adult height will be:

- A. About 6'2".
- B. About 5'2".
- C. Somewhere in between 5'2" and 6'2".
- D. The same as your Aunt Jenny (everyone says you look like her).

Answer: C. Is the right answer, usually. But many kids end up either shorter or taller than both parents.
