### Important information you need to know

We may change the information contained in this document from time to time. We will communicate any changes to the way we pay medicines when we make these changes.

The Chronic Illness Benefit (CIB) is determined by the Retail Medical Scheme Rules. The use of the benefits and programmes linked with the Chronic Illness Benefit are subject to specific conditions and rules. You must make sure that you are aware of the Rules and understand what they mean for the management of your conditions.

Any instructions or advice on medicines and the management of your condition are intended to add to, and not replace, the knowledge, expertise, skill and judgement of your doctor, pharmacist or other healthcare professional.

You get full cover for approved chronic medicine on the medicine list. For medicine not on the medicine list, we provide cover up to a set monthly rand amount called the Chronic Drug Amount (CDA).

Retail Medical Scheme and Discovery Health (Pty) Ltd reserve the right to change the benefit at any time.

## Explanation of terms

### Active ingredient

This is the main substance in a medicine that is responsible for the clinical action on a human body.

### Benefit year

A benefit year refers to the benefits you are entitled to during a calendar year, that is to say 1 January to 31 December. This medicine list (formulary) and Chronic Drug Amounts are applicable for 2025 only.

### Chronic Disease List (CDL)

This is a defined list of chronic conditions we cover according to the Prescribed Minimum Benefits.

### Chronic Drug Amount (CDA)

The CDA is a monthly amount we pay up to for a medicine class. This applies to medicine that is not listed on the medicine list (formulary). The Chronic Drug Amount includes VAT and the dispensing fee.

### Medicine class

This describes medicines that have similar chemical structures or similar therapeutic effects.

### Prescribed Minimum Benefit (PMB) conditions

These are conditions which all medical schemes are required to cover in terms of the Medical Schemes Act (No 131 of 1998), according to clinical guidelines.
